

84050 Bachelor of Arts (Honours) in Applied and Media Arts SPD4498-202A/202B Industrial Collaboration Project Semester 2, 2016/17 Self-reflection Report

Subject Lecturer: Wylie Chan Student Name: Choi Wing Tung Student Number: 15076918S We got a lot challenges in this project. However I feel luckily cooperate with my team members, we have a good discussion atmosphere and cooperation.

As it is confused at the beginning of the project, we discuss the concept and ideas for a long time and keep changing a lot. It is hard to think a workable campaign with funny but meaningful idea. We thought a lot different idea for the campaign and lastly, we chose workshop mixed up with war zone 90 and the donation box to ask for taking action. We considered donation is one of the easiest ways to attract the public to take action. People only need to find out what they do not need anymore and donate it. Although it might take a lot process and employees and storage on it, it is a one of causing public attention way.

I mainly responsible for the website layout design part. It is a web page layout design for our campaign. We put all elements of our campaign to the website, aim to show to the public the information of our campaign. It is a subpage and event page for Humanitarian Education Centre. The reason for one page design is we do not want to distract the visitors and they can easy to find out that it is a campaign under Humanitarian Education Centre.

Also, I did the image about the donation box placed in school, it is a challenging part for me as I do not have a good concept for 3D modeling. It might not perfect perspective for that image.

Except these work, we gave opinion and ideas for the campaign concept and ideas to each other, to improve our work.

For the campaign, I know we have a lot to improve, such as the consideration of budget and feasibility. We should consider how many employees need to involved and the feedback.

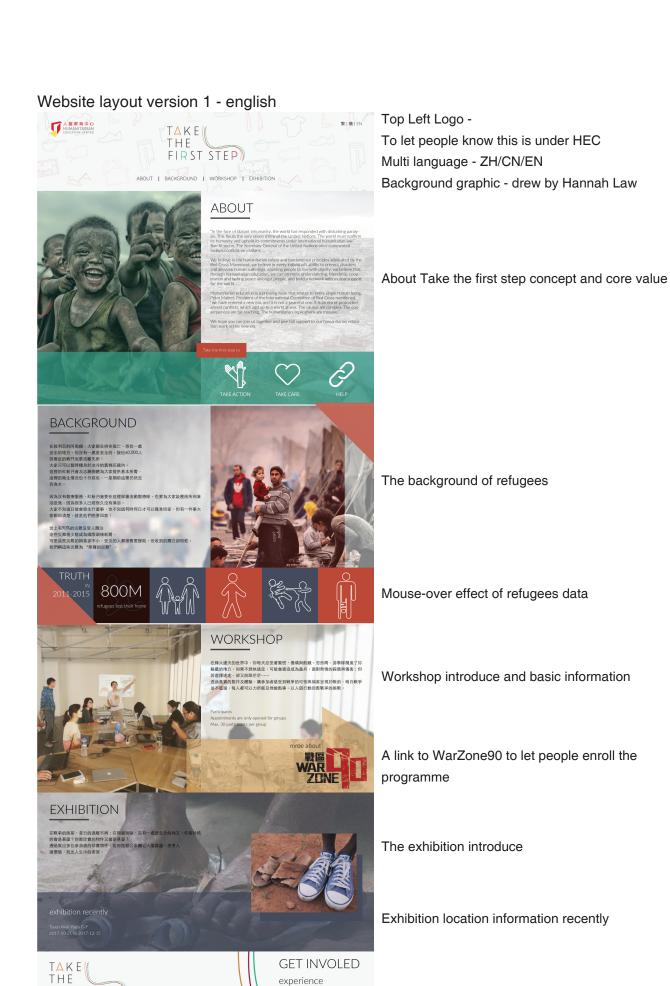

I understand that it is still have a lot work to prepare if the campaign need to implement. It need to consider cost, manpower and material support.

Besides, we can make more guideline for the workshop circuit for employee reference. It is useful for the new employee to involve the campaign.

To make a complete design, we might need to make more detail for the donation box and workshop. we might make some stickers and social media post for promoting the campaign.

During the project, I think everyone did a great job. Everyone got different parts to do and cooperate together finally. They are the best team members! Such as the donation box made by Emily, and it will make used on Sharon, Cman and My works. I appreciate Emily very much. She have a clear mind to organize the whole campaign and the work. She lead us to finish the project follow by steps by steps.
